

TP MODUL 12

Nama: Zhafir Zaidan Avail
NIM: 2311104059

Hasil run:
Sebelum input

Setelah input

Fungsi CariTandaBilangan:

```
private string CariTandaBilangan(int a)
{
    if (a < 0)
        return "Negatif";
    else if (a > 0)
        return "Positif";
    else
```

```
        return "Nol";  
    }  
}
```

Logika Saat Tombol Ditekan:

```
private void btnProses_Click(object sender, EventArgs e)  
{  
    int inputAngka;  
    if (int.TryParse(txtInput.Text, out inputAngka))  
    {  
        string hasil = CariTandaBilangan(inputAngka);  
        lblHasil.Text = hasil;  
    }  
    else  
    {  
        lblHasil.Text = "Input tidak valid!";  
    }  
}
```

Menambahkan Unit Testing:

```
[TestClass]  
public class UnitTest1  
{  
    [TestMethod]  
    public void TestNegatif()  
    {  
        var form = new Form1();  
        Assert.AreEqual("Negatif", form.CariTandaBilangan(-5));  
    }  
  
    [TestMethod]  
    public void TestNol()  
    {  
        var form = new Form1();  
        Assert.AreEqual("Nol", form.CariTandaBilangan(0));  
    }  
  
    [TestMethod]  
    public void TestPositif()  
    {  
        var form = new Form1();  
        Assert.AreEqual("Positif", form.CariTandaBilangan(10));  
    }  
}
```
